

CARDBOARD RECYCLING PLANT

Promeco Cardboard recycling plant turns old corrugated cardboard (OCC) and waste paper to paper fiber, changing their features and physical properties. The result of the process is a new product «Pulps of fibers derived from recovered (waste and scrap) paper or paperboard», classified under HS code HS 4706 2000 and is suitable to be exported to China.

INPUT MATERIAL

OUTPUT MATERIAL

- Dry paper pulp for paper mills

PRODUCTION

- Cardboard from Group 1- Ordinary Grades
- From Supermarket corrugated paper and board
- 1.05 Old corrugated containers

ADVANTAGES

- Innovative
- Competitive
- Low management and operational costs
- Production: from 4 to 10 ton/h of baled feedstock

ADVANTAGES FOR CHINESE PAPER MILLS

- Increase of the material available
- Efficiency of the pulperizing process from +15 to +25%
- 10-20% energy saving
